

Exhibition Area

Isehara Science Center is the place where you can experience the wonder and the fun of science.

Its six exhibition areas can offer you the opportunities in which you can learn not only about the environment and living creatures around us but also about the mechanism of science close to our daily life.

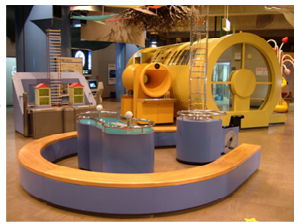

First, please read the explanations at the exhibits carefully, then watch, touch and explore. You'll surely make a new discovery or get an inspiration.

We hope that Isehara Science Center will help you to develop your scientific mind.

Entrance

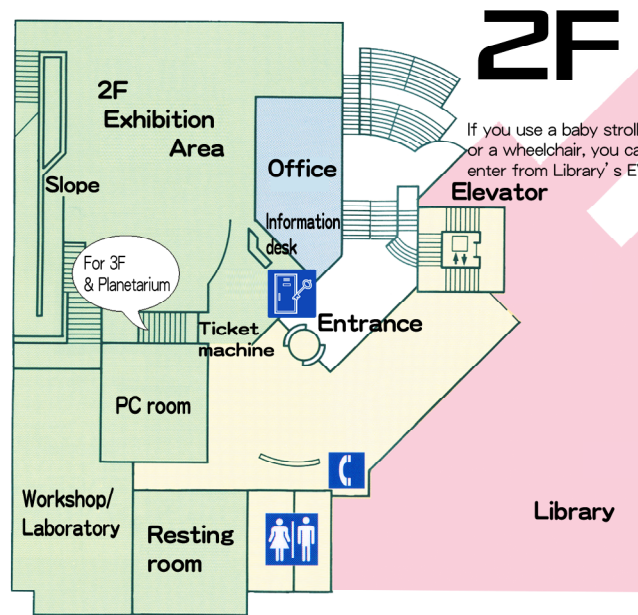

What kind of wonder are you going to find?

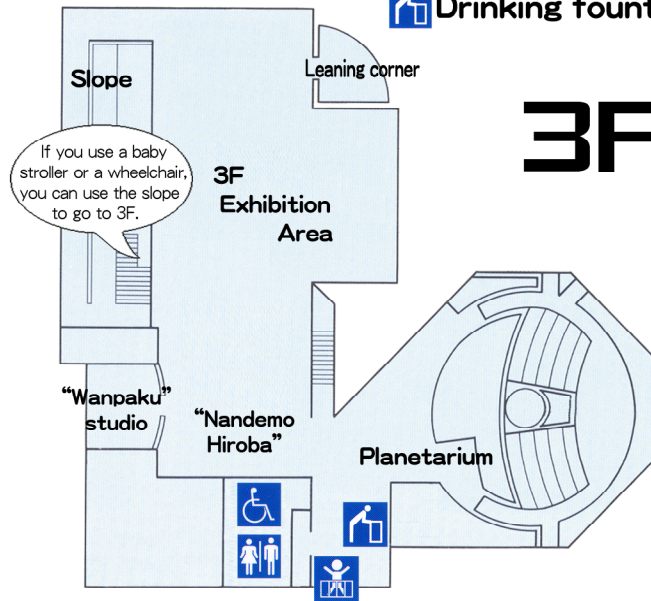

Exhibition areas have the experiment corners about sound, light and air.

Special events such as handicraft making and experiment demonstrations are held on weekends.

- Coin-locker
- Toilet
- Call Box
- Crib
- Toilet for a handicapped person
- Drinking fountain

Please refrain from eating or drinking in the exhibition areas and in the planetarium.
 You can re-enter the same day if you show the ticket.
 If you want to nurse, please come to the information desk.

Planetarium

Programs for all ages

We prepare programs for all ages and introduce seasonal constellations.

Programs for kids

We prepare programs for kids and introduce seasonal constellations.

- Projection period of time is about 45-50 minutes.
- If you want to know the full programs, please ask us.

Astronomical observation room

The rooftop dome is an astronomical observation room. You can observe night sky of Isehara by "COUDÉ-type telescope". For the observation date, please ask us.
